REDBAT® SOFTWARE RECOGNIZED AS LAUREATE BY THE COMPUTERWORLD HONORS PROGRAM

Global Information Technology Awards Foundation Pays Tribute to Individuals and Organizations that Use Information Technology to Benefit Society

AUSTIN, TX — JUNE 14, 2007 — RedBat® software, used to automatically detect community disease outbreaks, has been recognized as a Laureate by the Computerworld Honors Program. Each year, Computerworld Honors acknowledges those individuals and organizations that have used information technology to benefit society. Members of the Chairmen's Committee, a group of 100 Chairman/CEOs of global technology companies, nominates individuals and organizations around the world whose visionary applications of information technology promotes positive social and economic progress.

"This recognition is made possible by our RedBat® customers at hospitals, call centers, and local and state health departments across the country. They are the heroes who are keeping their communities safe with an early warning system to prevent the spread of illness," said Deborah Martin, CEO of ICPA, Inc., which develops and markets the RedBat syndromic surveillance software.

"RedBat is a component of our community-wide surveillance program, which enables us to identify potential public health threats, such as influenza season, gastrointestinal illnesses and other communicable disease outbreaks, and to act quickly and alert other health providers of the spread of disease. An effective surveillance program is especially important given the potential for rapid disease transmission due to global travel and shipment of goods. RedBat is now another "tool" in its "tool box" that public health can utilize," said Roger Sanchez, chief epidemiologist, San Antonio Metropolitan Health District.

"Each year, the Computerworld Honors Program seeks to recognize organizations, from a variety of sectors, for their ongoing efforts to utilize technology in order to benefit society," said Ron Milton, Chairman of the Board of Trustees for the Computerworld Information Technology Awards Foundation and Executive Vice President of Computerworld. "We are proud to provide a platform to publicly acknowledge these contributions."

"Each Laureate selected for this honor understands the importance of using one's resources and technical prowess to benefit one's fellow man," said Bob Carrigan, Chairman of the Computerworld Honors Program Chairmen's Committee and President, IDG Communications.

About ICPA, Inc.

ICPA, Inc. is dedicated to the development of quality healthcare software solutions that collect and analyze data with the goal of reducing and preventing healthcare-acquired infections, tracking employee health and monitoring the health of the community. ICPA is located in Austin, TX, and has been providing healthcare solutions in the U.S., Canada, and abroad for over 20 years. For more information, visit www.icpa.net.

About Computerworld

Computerworld is the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning weekly publication, Computerworld.com Web site (www.computerworld.com), focused conference series and custom research form the hub of the world's largest (40+ edition) global IT media network. In the past five years alone, Computerworld has won more than 100 awards, including Folio Magazine's 2006 Gold EDDIE Award for the best technology/computing magazine, the 2004 and 2006 Magazine of the Year Award, and 2006 Best Overall Web Publication from the American Society of Business Publication Editors (ASBPE).

Computerworld leads the industry with a print audience of 1,252,000 readers each week (IntelliQuest CIMS Spring 2006) and an online audience of over 2 million unique monthly visitors (Omniture).

Computerworld is a business unit of International Data Group (IDG), the world's leading technology media, research and events company. A privately held company, IDG publishes more than 300 magazines and newspapers, including CIO, CSO, Computerworld, GamePro, InfoWorld, Network World and PC World. The company features the largest network of technology-specific Web sites, with more than 400 around the world. IDG is also a leading producer of more than 170 computer-related events worldwide, including Storage Networking World®, Premier 100®, LinuxWorld Conference & Expo®, Macworld Conference & Expo, DEMO® and IDC Directions. IDC provides global market research and advice through offices in 50 countries. Company information is available at <http://www.idg.com>.
